## CALL FOR PROPOSALS

*Connect/2020/5464403*

*Pilot Project*

### **EU grants for small-scale online media: supporting high-quality news products and tackling fake news**

#### **1. INTRODUCTION – BACKGROUND**

The internet has not only vastly changed the volume and variety of news available to citizens but has also profoundly changed the ways citizens access and engage with news.

New technologies can be used, notably through social media, search engines and ads networks, to disseminate and support disinformation on a scale and with a speed and precision of targeting that is unprecedented. The rise of disinformation and the gravity of the threat have sparked growing awareness and concerns in civil society, both in EU Member States and internationally.

The spread of disinformation also affects policy-making processes by swaying public opinion. Domestic and foreign actors can use disinformation to manipulate policy and societal debates in areas such as climate change, migration, public security, health, and finance. Disinformation can also diminish trust in science and empirical evidence (e.g. campaigns against vaccination). It can influence behaviour as well and may encourage people to act in ways that put health and safety at risk.

The April 2018 Commission Communication “Tackling online disinformation – An European approach”<sup>1</sup> has analysed the phenomenon of online disinformation and devised a strategy to limit its impact while respecting freedom of expression and other fundamental rights and democratic values. One of the key elements of such a strategy is to create a European multidisciplinary community composed of independent fact-checking organisations and academic researchers with expertise in the field of online disinformation, and open to collaborations with media organisations and media literacy practitioners. As set out in the Action Plan against disinformation<sup>2</sup>, such joint efforts should leverage on multidisciplinary teams established at national or regional level in order to capture specific knowledge about information environments with local and/or linguistic characteristics.

As analysed in the June 2020 Communication “Tackling COVID-19 disinformation”, the COVID-19 pandemic has been accompanied by an overflow of information through online media that has made it difficult for citizens to find trustworthy sources and reliable guidance. This situation has created fertile soil for the spread of disinformation, which has revealed the need for a dedicated and independent research infrastructure capable of detecting, analysing and exposing disinformation campaigns in real-time and across the whole EU territory.

The European Digital Media Observatory (EDMO), which has become operational on the 1st of June 2020 responds to such need.<sup>3</sup> EDMO will support the creation and the activities of the above-mentioned European multidisciplinary research community to address the relevant actors, vectors, tools, methods, prioritised targets and its impact on society of disinformation campaigns.

EDMO will also provide the necessary evidence and specific knowledge to public authorities in charge of monitoring and assessing platforms’ policies under the Code of Practice on disinformation.<sup>4</sup> Moreover, it will provide relevant and updated material to media literacy practitioners to sharpen their initiatives aimed at enhancing critical thinking of digital media users.

## **Legal Basis**

Pilot project within the meaning of Article 58(2)(a) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

The annual work programme was adopted under Commission Decision **C/2020/2259** of 20/04/2020.

## **2. OBJECTIVE – ACTIVITIES – PRIORITIES – RESULTS**

The objective of this call is to support the EU strategy to tackle disinformation and complement EDMO’s activities by providing funding to specific research projects on disinformation. Such projects, which include fact-checking and analysis of online propagation patterns, should be carried out by expert teams with a specific knowledge of information and media environments in one or more Member States.

Applicants are expected to commit that they will actively contribute to EDMO’s activities by focusing on social and political themes and narratives targeted by disinformation campaigns, which fit with the research agenda that EDMO will develop in view of the evolving threats posed by disinformation, in accordance with its governance

<sup>3</sup> <https://edmo.eu/edmo-homepage/>

<sup>4</sup> <https://ec.europa.eu/digital-single-market/en/news/code-practice-disinformation>

rules. Each project will have the possibility to access EDMO's technological platform under the conditions set out by the EDMO governance board.

Proposals must ensure the involvement of media organisations, and specific expertise in fact-checking, media literacy, network science, data and computer science. Moreover, the projects should be able to reach out, whenever necessary, to experts in areas that might become target of disinformation campaigns (e.g. health, climate change, immigration, European policies). These projects will focus their journalistic investigations and research activities around emerging digital media vulnerabilities and disinformation campaigns, which are of special relevance within the territory and/or linguistic area in which they will operate.

### **Activities to be covered by the Pilot Project:**

#### **1. Analysis and detection of harmful disinformation campaigns at national/regional level and their impact on society and democracy**

Each proposal must describe how the project will:

- Promptly detect emerging disinformation campaigns with potential negative impact on public opinion-forming at national/regional level, and assess such an impact;
- Analyse relevant actors, vectors, tools, methods, dissemination dynamics, prioritised targets of disinformation campaigns, in coordination with EDMO;
- Actively contribute to the EDMO investigation and research activities, and promptly react to requests from EDMO linked to emerging disinformation issues.

#### **2. Expose disinformation campaigns, including their impact on society and democracy**

Each proposal must describe how it will ensure:

- The implementation of appropriate means of communication, including conferences and seminars, and a website connected to the EDMO public page, to be used to make public the outcome of the project's activities;
- The involvement of media organisation(s) to carry out effective communication campaigns targeting relevant audiences. Cooperation with media organisations not directly involved in the projects could also be considered in order to extend the outreach of the research results.

#### **3. Media literacy activities at national/regional level**

Each proposal must describe how it will:

- Organise media literacy campaigns and events and create media literacy material targeted to the national/regional needs;
- Leverage on the exchange of good practices and materials stored on the EDMO platform as well as, if relevant, from available results of the

Preparatory Action “Media Literacy for All”<sup>5</sup>. Contribute to EDMO’s repositories with newly created educational and training materials and, in particular, will develop specific training for journalists;

- Ensure that journalists working for the media organisations taking part to the funded projects will be involved in the activities carried out by the academic and fact-checking experts, so as to acquire the necessary knowledge of state-of-the-art tools and techniques to detect and properly debunk disinformation campaigns.

All proposals are encouraged to include a sustainability plan, including activities that will contribute to the continuation of the activities without the Pilot Project funding in the future.

## Results

The Pilot Project facilitates the creation of independent national multidisciplinary teams, which include media practitioners, fact-checkers and academic researchers. The Pilot Project will enable fact-checkers academics and media practitioners, to detect, analyse and expose disinformation campaigns and their impact on society. Moreover, the Pilot Project is expected to support targeted media literacy activities as well as journalists training focused on the use of state-of-the-art technology to detect and debunk disinformation campaigns..

<sup>15</sup> Article II.12 of the Model Grant Agreement

<sup>16</sup> Article II.19.3 of the Model Grant Agreement

**Applicants' attention is drawn to the fact that if they are receiving an operating grant financed by the EU or Euratom budget, they may not declare indirect costs for the period(s) covered by the operating grant, unless they can demonstrate that the operating grant does not cover any costs of the action.**

In order to demonstrate this, in principle, the beneficiary should:

- a. use *analytical cost accounting that allows to separate all costs (including overheads)* attributable to the operating grant and the action grant. For that purpose the beneficiary should use *reliable accounting codes and allocation keys* ensuring that *the allocation* of the costs is done in a *fair, objective and realistic way*.
- b. *record separately*:
  - all costs incurred for the operating grants (i.e. personnel, general running costs and other operating costs linked to the part of its usual annual activities), and
  - all costs incurred for the action grants (including the actual indirect costs linked to the action)

If the operating grant covers the entire usual annual activity and budget of the beneficiary, the latter is not entitled to receive any indirect costs under the action grant.

### **11.3. Ineligible costs<sup>17</sup>**

The following items are not considered as eligible costs:

- a) return on capital and dividends paid by a beneficiary;
- b) debt and debt service charges;
- c) provisions for losses or debts;
- d) interest owed;
- e) doubtful debts;
- f) exchange losses;
- g) costs of transfers from the Commission charged by the bank of a beneficiary;
- h) costs declared by the beneficiary under another action receiving a grant financed from the Union budget. Such grants include grants awarded by a Member State and financed from the Union budget and grants awarded by bodies other than the Commission for the purpose of implementing the Union budget. In particular, beneficiaries receiving an operating grant financed by the EU or Euratom budget cannot declare indirect costs for the period(s) covered by the operating grant, unless they can demonstrate that the operating grant does not cover any costs of the action.
- i) contributions in kind from third parties;
- j) excessive or reckless expenditure;
- k) deductible VAT.

### **11.4. Eligible costs that may be covered by the single lump sum**

NOT APPLICABLE

---

<sup>17</sup> Article II.19.4 of the Model Grant Agreement

### **11.5. Balanced budget**

The estimated budget of the action must be attached to the application form. It must have revenue and expenditure in balance.

The budget must be drawn up in euros.

Applicants for whom costs will not be incurred in euros should use the exchange rate published in the Official Journal of the European Union.

The applicant must ensure that the resources which are necessary to carry out the action are not entirely provided by the EU grant.

Co-financing of the action may take the form of:

- the beneficiary's own resources,
- income generated by the action,
- financial contributions from third parties.

### **11.6. Calculation of the final grant amount<sup>18</sup>**

The final amount of the grant is calculated by the Commission at the time of the payment of the balance. The calculation involves the following steps:

#### **Step 1 — Application of the reimbursement rate to the eligible costs**

The amount under step 1 is obtained by applying the reimbursement rate specified in section 11.1.1 to the eligible costs actually incurred and accepted by the Commission.

#### **Step 2 — Limit to the maximum amount of the grant**

The total amount paid to the beneficiaries by the Commission may in no circumstances exceed the maximum amount of the grant as indicated in the grant agreement. If the amount obtained following Step 1 is higher than this maximum amount, the final amount of the grant is limited to the latter.

#### **Step 3 — Reduction due to the no-profit rule**

‘Profit’ means the surplus of receipts over the total eligible costs of the action, where receipts are the amount obtained following Steps 1 and 2 plus the revenue generated by the action for beneficiaries other than non-profit organisations.

In-kind and financial contributions by third parties are not considered receipts.

The total eligible costs of the action are the consolidated total eligible costs approved by the Commission. The revenue generated by the action is the consolidated revenue established, generated or confirmed for beneficiaries other than non-profit organisations on the date on which the request for payment of the balance is drawn up.

If there is a profit, it will be deducted in proportion to the final rate of reimbursement of the actual eligible costs of the action approved by the Commission.

---

<sup>18</sup> Article II.25 of the Model Grant Agreement

## Step 4 — Reduction due to improper implementation or breach of other obligations

The Commission may reduce the maximum amount of the grant if the action has not been implemented properly (i.e. if it has not been implemented or has been implemented poorly, partially or late), or if another obligation under the Agreement has been breached.

The amount of the reduction will be proportionate to the degree to which the action has been implemented improperly or to the seriousness of the breach.

### 11.7. Reporting and payment arrangements

#### 11.7.1 Payment arrangements<sup>19</sup>

The beneficiary may request the following payments provided that the conditions of the grant agreement are fulfilled (e.g. payment deadlines, ceilings, etc.). The payment requests shall be accompanied by the documents provided below and detailed in the grant agreement:

Payment request	Accompanying documents
A <b>pre-financing payment</b> corresponding to 50% of the maximum grant amount	[financial guarantee (see section 11.7.2)]
<b>Payment of the balance</b> The Commission will establish the amount of this payment on the basis of the calculation of the final grant amount (see section 11.6 above). If the total of earlier payments is higher than the final grant amount, the beneficiary will be required to reimburse the amount paid in excess by the Commission through a recovery order.	(a) final technical report (b) final financial statement (c) summary financial statement aggregating the financial statements already submitted previously and indicating the receipts (d) [a certificate on the financial statements and underlying accounts <sup>20</sup> ]

Please note that the beneficiary/consortium will deliver an interim report not linked to a payment. The purpose of this report is to describe the work done in the first 6 months of the project.

In case of a weak financial capacity of a beneficiary, section 8.1 above applies.

#### 11.7.2 Pre-financing guarantee

A pre-financing guarantee for up to the same amount as the pre-financing may be requested in order to limit the financial risks linked to the pre-financing payment.

The financial guarantee, in euro, shall be provided by an approved bank or financial institution established in one of the EU Member States. When the beneficiary is

<sup>19</sup> Articles I.4 and I.5 of the Model Grant Agreement

<sup>20</sup> The decision on the request for certificates on the financial statements and the threshold will be taken by the Authorised Representative Officer of the Commission during the evaluation of the proposal.

established in a third country, the Commission may agree that a bank or financial institution established in that third country may provide the guarantee if it considers that the bank or financial institution offers equivalent security and characteristics as those offered by a bank or financial institution established in a Member State. Amounts blocked in bank accounts shall not be accepted as financial guarantees.

The guarantee may be replaced by:

- a joint and several guarantee by a third party or,
- a joint guarantee of the beneficiaries of an action who are parties to the same grant agreement.

The guarantee shall be released as the pre-financing is gradually cleared against interim payments or the payment of the balance, in accordance with the conditions laid down in the grant agreement.

As an alternative to requesting a guarantee on pre-financing, the Commission may decide to split the payment of pre-financing into several instalments.

## **11.8. Other financial conditions**

### **a) Non-cumulative award**

An action may only receive one grant from the EU budget.

Under no circumstances shall the same costs be financed twice by the Union budget. To ensure this, applicants shall indicate in the grant application the sources and amounts of Union funding received or applied for the same action or part of the action or for its (the applicant's) functioning during the same financial year as well as any other funding received or applied for the same action.

### **b) Non-retroactivity**

No grant may be awarded retrospectively for actions already completed.

A grant may be awarded for an action which has already begun only where the applicant can demonstrate in the grant application the need to start the action before the grant agreement is signed.

In such cases, costs eligible for financing may not have been incurred prior to the date of submission of the grant application.

### **c) Implementation contracts/subcontracting<sup>21</sup>**

Where the implementation of the action requires the award of procurement contracts (implementation contracts), the beneficiary may award the contract in accordance with its usual purchasing practices provided that the contract is awarded to the tender offering best value for money or the lowest price (as appropriate), avoiding conflicts of interest.

---

<sup>21</sup> Articles II.10 and II.11 of the Model Grant Agreement

The beneficiary is expected to clearly document the tendering procedure and retain the documentation in the event of an audit.

Entities acting in their capacity as contracting authorities within the meaning of Directive 2014/24/EU<sup>22</sup> or contracting entities within the meaning of Directive 2014/25/EU<sup>23</sup> must comply with the applicable national public procurement rules.

Beneficiaries may subcontract tasks forming part of the action. If they do so, they must ensure that, in addition to the above-mentioned conditions of best value for money and absence of conflicts of interests, the following conditions are also complied with:

- a) subcontracting does not cover core tasks of the action;
- b) recourse to subcontracting is justified because of the nature of the action and what is necessary for its implementation;
- c) the estimated costs of the subcontracting are clearly identifiable in the estimated budget;
- d) any recourse to subcontracting, if not provided for in description of the action, is communicated by the beneficiary and approved by the Commission. The Commission may grant approval:
  - (i) before any recourse to subcontracting, if the beneficiaries requests an amendment
  - (ii) after recourse to subcontracting if the subcontracting:
    - is specifically justified in the interim or final technical report and
    - does not entail changes to the grant agreement which would call into question the decision awarding the grant or be contrary to the equal treatment of applicants;
- e) the beneficiaries ensure that certain conditions applicable to beneficiaries, enumerated in the grant agreement (e.g. visibility, confidentiality, etc.), are also applicable to the subcontractors.

#### **d) Financial support to third parties<sup>24</sup>**

The applications may not envisage provision of financial support to third parties.

## **12. PUBLICITY**

### **12.1. By the beneficiaries**

Beneficiaries must clearly acknowledge the European Union's contribution in all publications or in conjunction with activities for which the grant is used.

<sup>23</sup> Directive 2014/25/EU of the European Parliament and of the Council of 26 February 2014 on procurement by entities operating in the water, energy, transport and postal services sectors and repealing Directive 2004/17/EC (OJ L 94, 28.3.2014, p. 243-374)

<sup>24</sup> Article II.12 of the Model Grant Agreement

In this respect, beneficiaries are required to give prominence to the name and emblem of the European Commission on all their publications, posters, programmes and other products realised under the co-financed project.

To do this they must use the text, the emblem and the disclaimer available at [https://ec.europa.eu/info/resources-partners/european-commission-visual-identity\\_en](https://ec.europa.eu/info/resources-partners/european-commission-visual-identity_en).

If this requirement is not fully complied with, the beneficiary's grant may be reduced in accordance with the provisions of the grant agreement.

## **12.2. By the Commission**

With the exception of scholarships paid to natural persons and other direct support paid to natural persons in most need, all information relating to grants awarded in the course of a financial year shall be published on an internet site of the European Union institutions no later than the 30 June of the year following the financial year in which the grants were awarded.

The Commission will publish the following information:

- name of the beneficiary;
- address of the beneficiary when the latter is a legal person, region when the beneficiary is a natural person, as defined on NUTS 2 level<sup>25</sup> if he/she is domiciled within the EU or equivalent if domiciled outside the EU;
- subject of the grant;
- amount awarded.

Upon a reasoned and duly substantiated request by the beneficiary, the publication shall be waived if such disclosure risks threatening the rights and freedoms of individuals concerned as protected by the Charter of Fundamental Rights of the European Union or harm the commercial interests of the beneficiaries.

## **13. PROCESSING OF PERSONAL DATA**

If processing your reply to the call for proposals involves the recording and processing of personal data (such as your name, address and CV), such data will be processed pursuant to Regulation (EU) 2018/1725 on the protection of natural persons with regard to the processing of personal data by the Union institutions, bodies, offices and agencies and on the free movement of such data, and repealing Regulation (EC) No 45/2001 and Decision No 1247/2002/EC.

## Appendix

### Specific conditions for direct personnel costs

#### 1. Calculation

The ways of calculating eligible direct personnel costs laid down in points (a) and (b) below are recommended and accepted as offering assurance as to the costs declared being actual.

The Commission may accept a different method of calculating personnel costs used by the beneficiary, if it considers that it offers an adequate level of assurance of the costs declared being actual.

#### a) for persons working exclusively on the action:

*{ monthly rate for the person*

*multiplied by*

*number of actual months worked on the action }*

The months declared for these persons may not be declared for any other EU or Euratom grant.

The **monthly rate** is calculated as follows:

*{ annual personnel costs for the person*

*divided by 12 }*

using the personnel costs for each full financial year covered by the reporting period concerned.

If a financial year is not closed at the end of the reporting period, the beneficiaries must use the monthly rate of the last closed financial year available;

#### b) for persons working part time on the action

(i) If the person is assigned to the action at a fixed pro-rata of their working time:

*{ monthly rate for the person multiplied by pro-rata assigned to the action*

*multiplied by*

*number of actual months worked on the action }*

The working time pro-rata declared for these persons may not be declared for any other EU or Euratom grant.

The monthly rate is calculated as above.

(ii) In other cases:

*{hourly rate for the person multiplied by number of actual hours worked on the action}*

or

*{daily rate for the person multiplied by number of actual days worked on the action}*

(rounded up or down to the nearest half-day)

The number of actual hours/days declared for a person must be identifiable and verifiable.

The total number of hours/days declared in EU or Euratom grants, for a person for a year, cannot be higher than the annual productive hours/days used for the calculations of the hourly/daily rate. Therefore, the maximum number of hours/days that can be declared for the grant are:

*{number of annual productive hours/days for the year (see below)}*

*minus*

*total number of hours and days declared by the beneficiary, for that person for that year, for other EU or Euratom grants}.*

The '**hourly/daily rate**' is calculated as follows:

*{annual personnel costs for the person*

*divided by*

*number of individual annual productive hours/days}* using the personnel costs and the number of annual productive hours/days for each full financial year covered by the reporting period concerned.

If a financial year is not closed at the end of the reporting period, the beneficiaries must use the hourly/daily rate of the last closed financial year available.

The 'number of individual annual productive hours/days' is the total actual hours/days worked by the person in the year. It may not include holidays and other absences (such as sick leave, maternity leave, special leave, etc). However, it may include overtime and time spent in meetings, trainings and other similar activities.

## **2. Documentation to support personnel costs declared as actual costs**

For **persons working exclusively on the action**, where the direct personnel costs are calculated following **point (a)**, the beneficiaries must keep **time records** for the number of hours/days declared. The time records must be in writing and approved by the persons working on the action and their supervisors, at least monthly.

For **persons assigned to the action at a fixed pro-rata of their working time**, where the direct personnel costs are calculated following **point (b)(i)**, the beneficiaries must keep **time records** for the number of hours/days declared. The time records must be in writing and approved by the persons working on the action and their supervisors, at least monthly.

For **persons working part time on the action**, where direct personnel costs are calculated following **point (b)(ii)**, the beneficiaries must keep **time records** for the number of hours/days declared. The time records must be in writing and approved by the persons working on the action and their supervisors, at least monthly.

In the absence of reliable time records of the hours worked on the action, the Commission may accept alternative evidence supporting the number of hours/days declared, if it considers that it offers an adequate level of assurance.
